Strong profile design

Hi - Tensile Anti Vandalise
Shear nuts

Wide Range

Many pole designs to chose from.
Different finishes and colours namely: Galvanised (for long life), Painted (Green, Blue and Black).
Panels and posts come in matching colours.

Modular

Fence comes in a panel form in various heights but standard length is 3m.
Panels can follow the contours by making use of the stepping technique.
The panels can be fitted between concrete pillars to give a different look.

Welded & Slotted

The special slots in the cross rails allow for less tampering with the pales.
The slots in the cross rail give a good looking finish to the panel.

Bolted

Due to its special safety bolts the product can take various contours along the fencing line, making it a cost effective option to varying terrain.
As the product is bolted, transport costs are also saved as more meters of fencing can be loaded on trucks due to the flat pack method.
No welders or grinders are required therefore, the damage to the finish is reduced and higher quality standards can be achieved.

Attractive

Fence gives a professional finish to the property and the buildings it protects.
Fence looks uniform.
